**THAT'S FUGITIVE
EMISSIONS JOURNAL.**

Fugitive Emissions Journal engages a diverse global network of producers, manufacturers, distributors and users of emission control technology, and inspires them to discover the very best information on the latest innovations and industrial advancements in combating emissions. The magazine brings readers the most up-to-date news on the ever-changing world of industrial emissions reduction by providing a comprehensive guide to industry standards, consent decrees and other technological initiatives. Helping facilities further develop programs to minimize emissions, the ultimate aim of the publication is to assist readers in improving and optimizing plant performance in the oil and gas, petrochemical, chemical, environmental and other related industries.

Through powerful company Cover Stories, white papers, interviews and valuable technical content, **Fugitive Emissions Journal** sets the agenda – all in an easy-to-read and share format, becoming your most valuable marketing tool in 2021.

Objectives

Raising brand and product awareness is the most common objective held by **Fugitive Emissions Journal**, followed by sales related objectives.

IN EVERY ISSUE

1 - Cover Story

Highlight your company's latest innovations, new product developments, business growth and achievements in a four-page article and cover story feature.

2 - Projects, News & Product Developments

Stay up-to-date on leading industrial emission news, exclusive projects, and innovative new monitoring technologies.

3 - Global Highlights Map

Check out new emission projects and global trends using the interactive map.

4 - New Technologies

Learn about the latest products and technologies available in emission control including LDAR, BWON, Flares, Instrumentation and Air Quality & Permitting innovations.

5 - End User Interviews

Exclusive interviews with end-users & EPCs discuss the latest projects, challenges faced by operators, technological advancements, vendor partnerships and more!

6 - White Papers & Technical Articles

Read in-depth articles highlighting technological advancements in emission control technologies, the latest in industry standards and more!

MEET OUR TEAM

Stephanie Matas is the Editor of Fugitive Emissions Journal. Steph uses her broad skillset to produce innovative media and bring industry experts together to highlight exceptional industry practices.

KCI Toronto Sales Manager Josh Gillen is responsible for account management in the Americas and overseeing daily sales operations.

Lindsay Jackson is responsible for event organization and marketing for KCI's events and publications in the Americas.

CONFERENCE & EXPO

FUGITIVE
EMISSIONS

SUMMIT

AMERICAS

The **Fugitive Emissions Summit Americas** addresses the ever-changing world of fugitive emissions regulations and control. With a strong emphasis on leak detection and repair, emission control & testing technologies and safety as they pertain to current regulations, the event brings together a community of end users, EPCs,

distributors, manufacturers, and suppliers dedicated to improving workplace practices, in efforts to reduce environmental damage caused by industrial emissions. Learn about the latest emission initiatives while networking with the industry's top professionals.

COURSES

With in-person and remote learning options available, KCI's educational portfolio has been developed through more than 30 years of unparalleled valve expertise.

INDUSTRIAL VALVE COURSE

Industrial valves are a complex subject. In order to make them do what they are supposed to do – control flow in a predictable way – it is crucial to understand not just how a valve works, but also all the processes associated with it, such as design, manufacturing, inspection and operation. Curated by a leading valve expert, the two 8-hours Industrial Valve courses, cover the most important topics addressed in Valve World.

FUGITIVE EMISSIONS COURSE

Taught by the industry's leading subject matter experts, the Fugitive Emissions course is a one-day education program designed to jump-start your career or provide a refresher on fugitive emissions pertaining to valves. Professionals will gain a generalized outline of fugitive emissions standards and expand their understanding of LDAR, EPA requirements and testing procedures, and equipment used in mitigating fugitive emissions.

Sponsorship options include courses of 20 participants for USD \$7,500 and the use of your products as examples by the instructors during our presentation.
